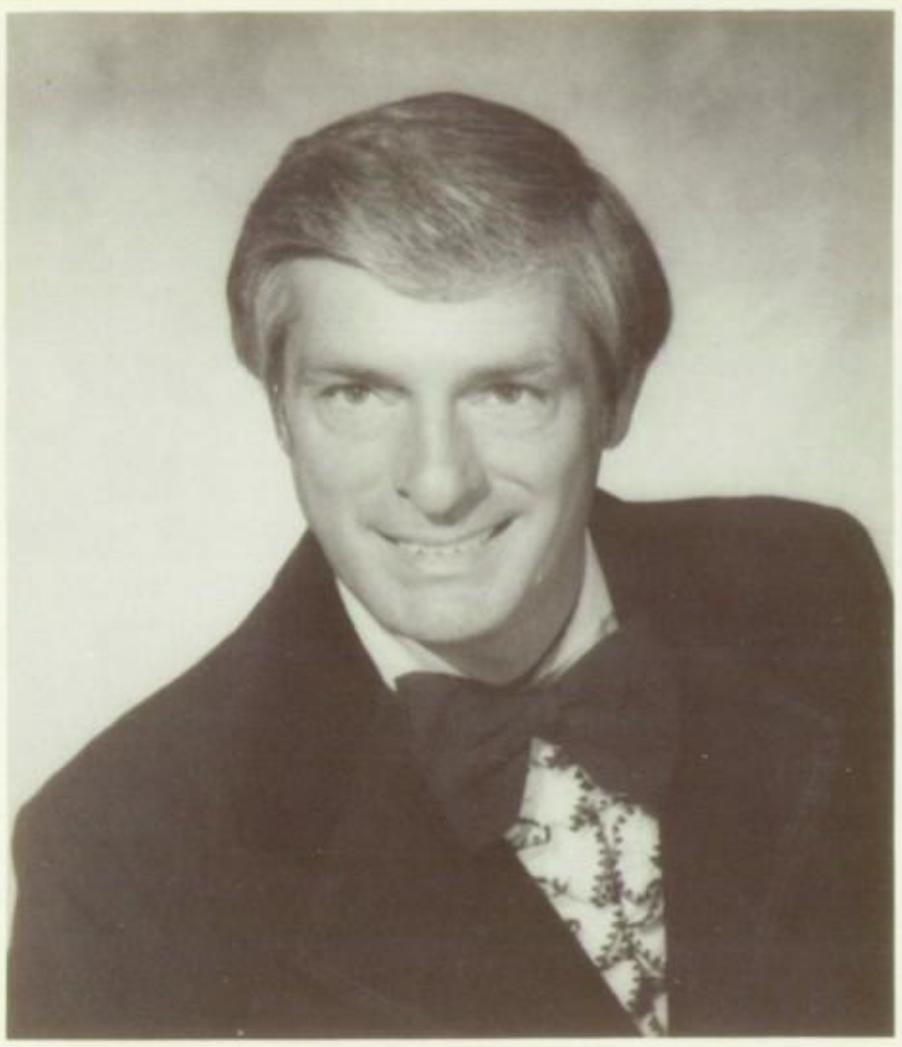
This Is Dedicated



To The One We Love

Who is that short man with the bow legs and big nose? That is our principal, and we love him.

We the Dragon Annual Staff and Chico student body proudly dedicate this book to Wilbur Levoid Crabbs, Jr., better known as Crabbo.

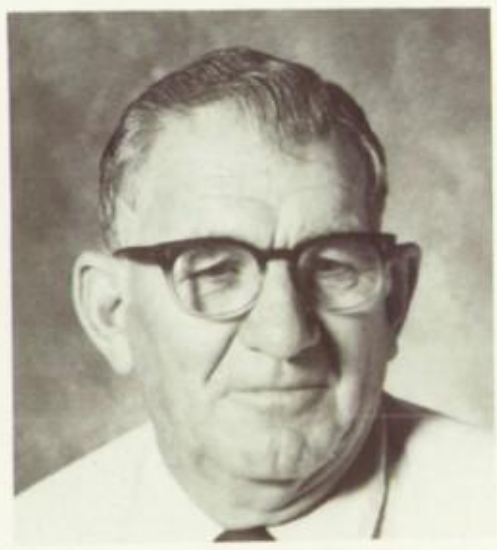
He was born in Fort Wayne, Indiana, and reared in Sturgis, Michigan. After spending three years in the Navy and four years in the Army, he went to North Texas State University. He lacks only his dissertation having his doctorate in Educational Administration.

Mr. Bill Crabbs taught fifth grade in H.E.B. and White Settlement. He was elementary principal in Grapevine for three years, assistant principal in White Settlement for one year, and high school principal in Holliday for three years.

This is his third year to be our high school principal. He has improved the relationships and attitudes of the students by really listening to them as people. Chico High School is a better place because he is here.

Standing: Danny Wells, LeeRoy McKeever; Seated: Richard McLeod, Sec.; Jerry Biggerstaff, Pres.; Scott Burgess

Mac Vincent, Superintendent



Elementary Principal, left, T.F. Singleton, Bill Crabbs, High School Principal

Our Administration Does Its Job Well

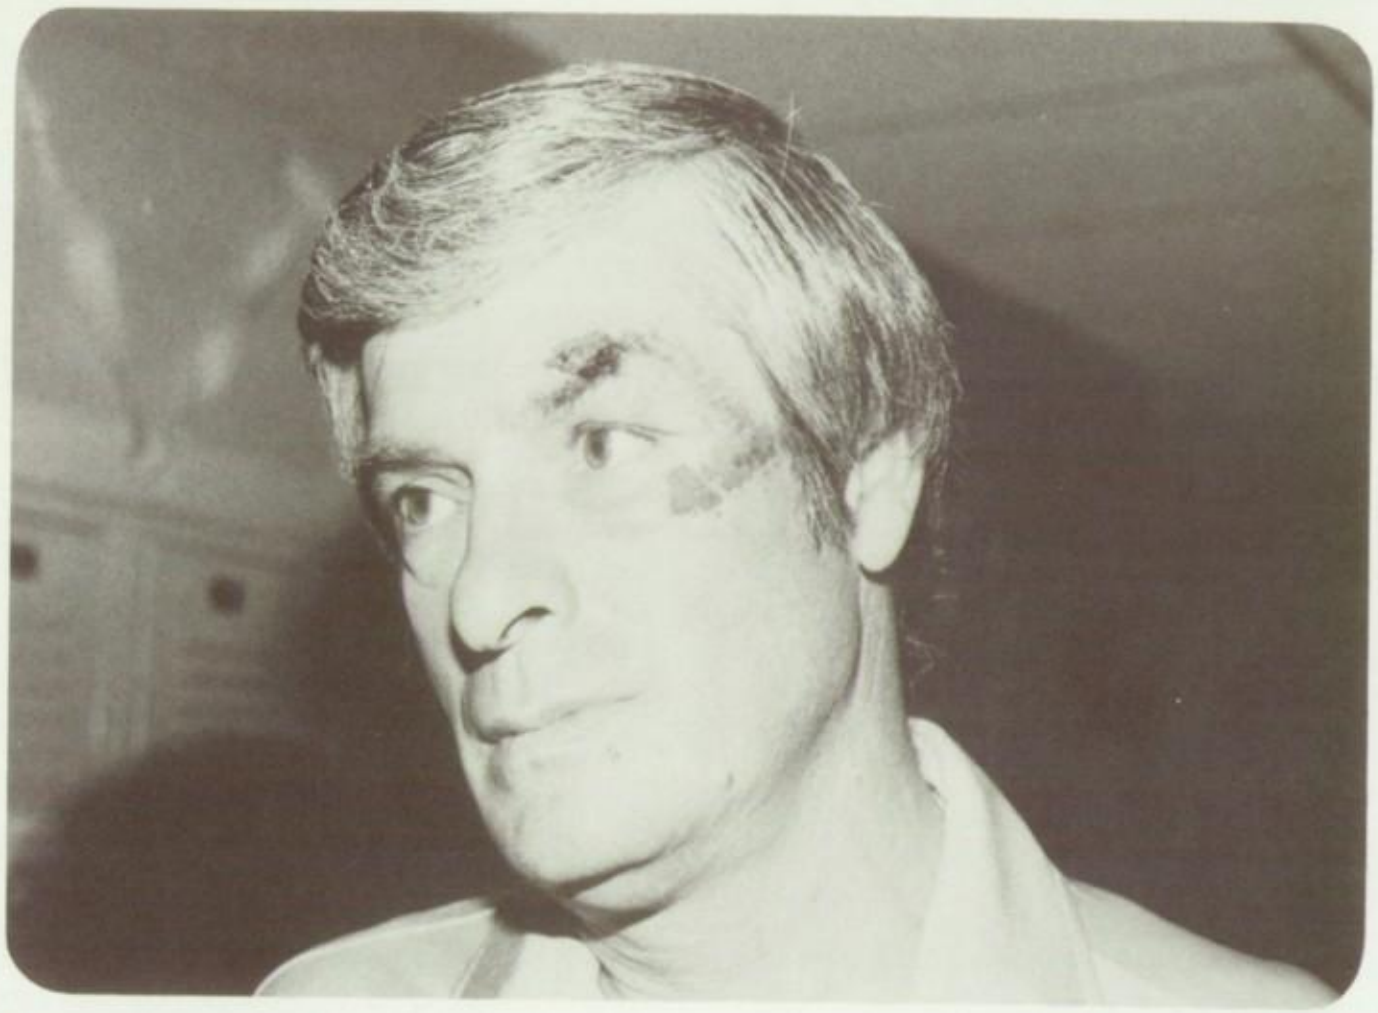
Teachers At Their Best

What Happened to you, Crabbo?



Who are you mad at now Coach

Thought we weren't supposed to sleep in class!

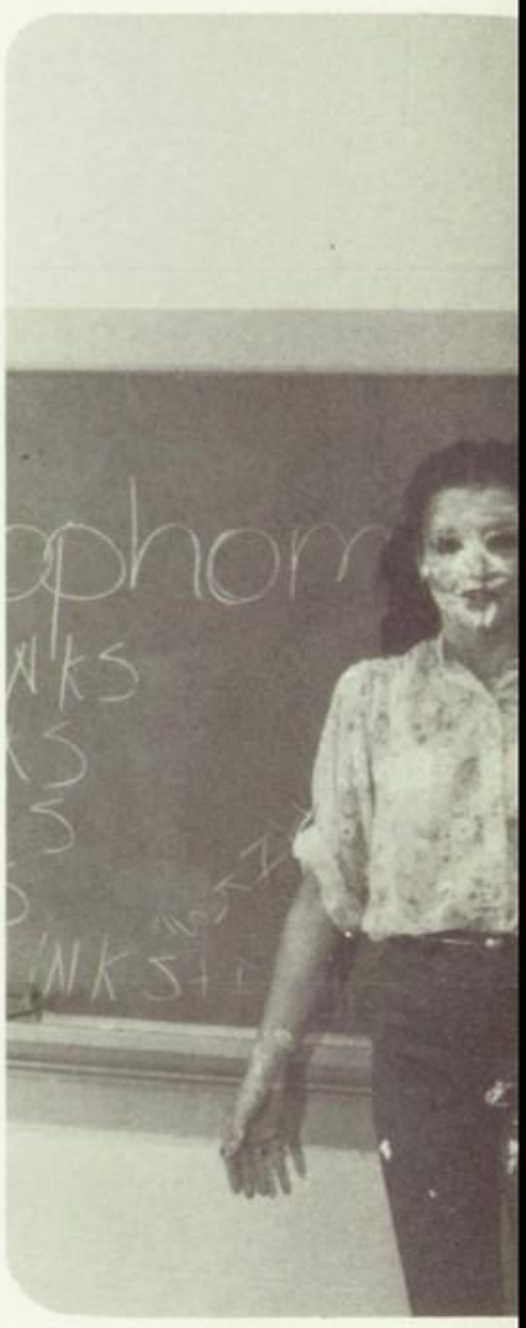
Mrs. Burgess, First Class.

Birthdays Are Fun!

Jan, 16 maybe, but sweet?

Mrs. Read, young and beautiful!

Trying to cover your wrinkles, Tema?



Crazy Days

Fifties Day And Costume Day Were Two Of The Craziest!

SAVING TIPS on electric air conditioning

Air conditioning provides lots of comfort during the summer months, but for many thousands of homeowners it is also the biggest factor in the cost of electricity. On the average, air conditioning accounts for about half of summertime electric bills.

Here are ways you can hold down the cost of air conditioning and still enjoy its comfort.

Central Systems

1. Set thermostat on 78°, or higher, during the summer. Turn unit off if you'll be away from home several days.
2. Keep equipment at top operating efficiency. Have it checked seasonally by qualified serviceman.
3. Check filter every 30 days. Dirty filters cause equipment to use excessive electricity. If filter is permanent, clean by manufacturer's directions; if it's disposable, it should be replaced when dirty.
4. Keep furniture, draperies away from air outlets and returns. Clean grills often.
5. Close draperies and blinds to keep out direct sunlight.
6. Keep fireplace damper closed.
7. Proper home insulation keeps the heat out, cuts energy use. Insulation questions? Call TP&L.
8. Shade on roof and walls can reduce energy needed to cool. But trim trees, shrubs away from outside compressor unit. Keep it free of leaves, debris. If air flow is blocked, unit uses more energy.
9. Weatherstrip doors and windows; caulk cracks to prevent drafts and cool air loss.
10. Keep windows closed. Open outside doors as little as possible.

Window Units

Follow above suggestions, plus these:

11. Buy units with *highest* "energy efficiency ratio" (EER). Uses less electricity to cool. If EER is not on sales tag, ask for it or figure it yourself. Divide "wattage" into "BTU" capacity. Both figures are on unit.
12. Place unit where it'll get as little direct sun as possible.
13. Aim air outlets at lower half of doorway to next room to allow warm air from that room to enter at the doortop for recooling, recirculation.
14. Never vent air conditioner into garage. Ventilation is usually too poor for top performance of your unit.

Conserve electricity and you help conserve one or more of the fuels needed to produce it. Conserve fuels and you help assure that there will be enough to meet essential needs for electricity in the future.

When you pass a TP&L office, warehouse, generating plant or other facility, you'll see that we've turned off all non-essential lighting. And, in as many other ways as possible, TP&L is reducing its own uses of electricity.

If you would like additional information on conserving electricity, call the Customer Service Representative in the TP&L Office.
